

Latest information regarding the
B2E Technology Services -
Blockchain Offering

TECHNOLOGY SERVICES - BLOCKCHAIN

A public ledger of all cryptocurrency
transactions

Lead Principal: Aruna Koya

BLOCKCHAIN OVERVIEW

Blockchain, is an architecture design, that has been present for the last ten years, with Bitcoin being the most well-known use-case. More recently Ethereum has been the platform for implementation of B2C applications and services.

This is not always ideal for B2B solutions, so Hyperledger was introduced last year by the Linux Foundation. This implementation of Blockchain is the most suitable, secure and scalable implementation for the majority of enterprise applications. B2E offer a Hyperledger consultancy service, where we are able to establish, develop and deploy your Blockchain service.

Blockchain is only one technology area, and we are developing new and exciting specialities.

TYPICAL CHALLENGES

In the modern times, innovation is imperative for any organisation.

For example, a large service provider may be using legacy infrastructure or services. This means investment, in expensive new technology products, large migration projects, and user disruption. This in turn involves training, and development of resources, including new hires.

This is an extremely risky and expensive undertaking for most large organisations.

UNIQUE SOLUTIONS

B2E are able to de-risk this process, by providing specialists who know what tools and processes are needed to deliver this change.

We are able to offer an end-to-end offering to take your business services to the cutting edge. For a period of one or two years, B2E will advise, establish and delivery the technology change you require to boost your business services.

B2E also offer tailor-made consultancy services designed to augment your technology teams.

B2E's mission is to work with your existing teams to produce the most innovative solutions in your industry.

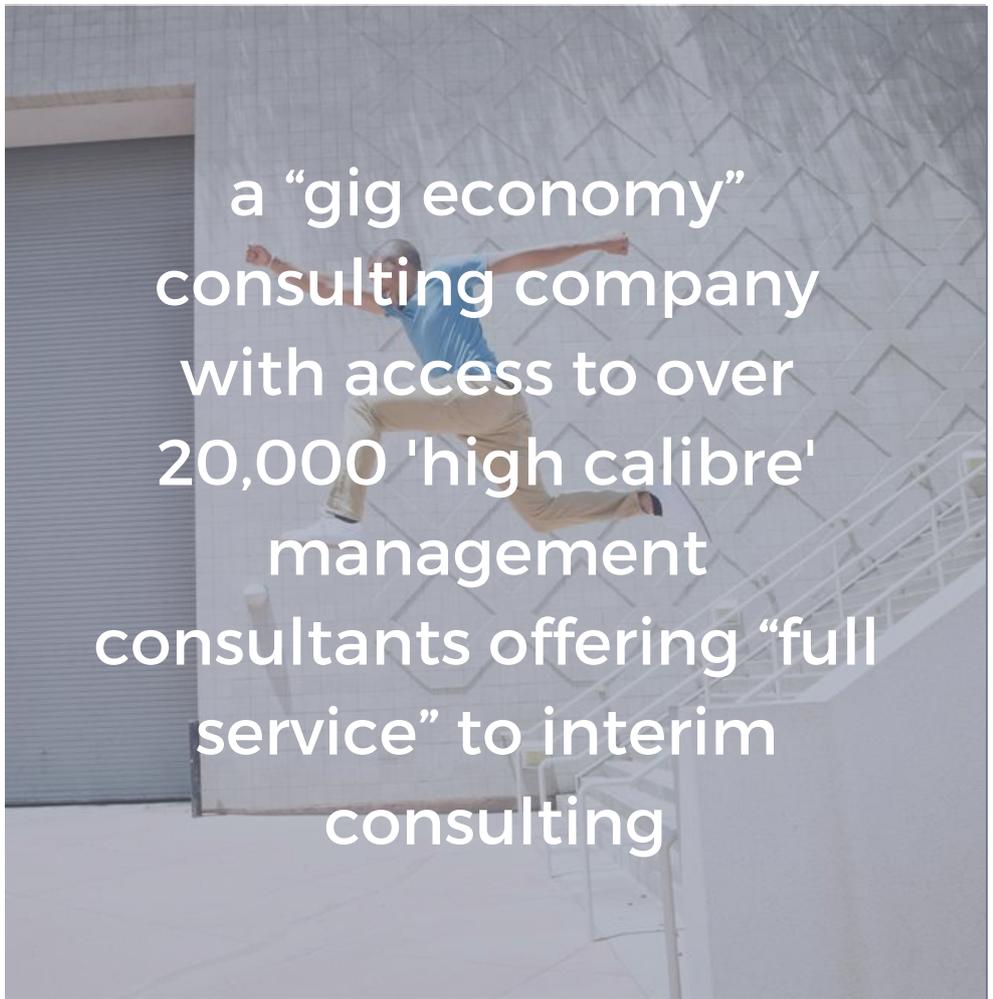

Aruna Koya is the B2E Consulting Principal leading the Blockchain Service Offering. She has spent 20 years working in the IT industry, starting as

Software Developer then Department Head & Delivery related roles, progressing through to Director level. She has worked for several global organisations, including Nokia, Verizon, and has more recently, helped to scale up the teams at Songkick. Her most recent projects, have seen her working to design and develop Blockchain solutions using Hyperledger, in the private, permissioned format for Enterprise solutions.

Service Offerings at B2E Consulting are supported by our community of over 20,000 high calibre, expert consultants, many with Blockchain experience. Our scale means that we are able to build teams of genuine SMEs to help support client initiatives.
