Lead Principal: Chris Wilton

PROGRAMME MANAGEMENT OVERVIEW

Programme Management within B2E Consulting is a significant part of our business with expertise gained over many years of working with Blue Chip companies on their most important and transformational programmes.

Our consultants have experience across a vast number of delivery types, from technical change programmes, through to business and organisational transformations.

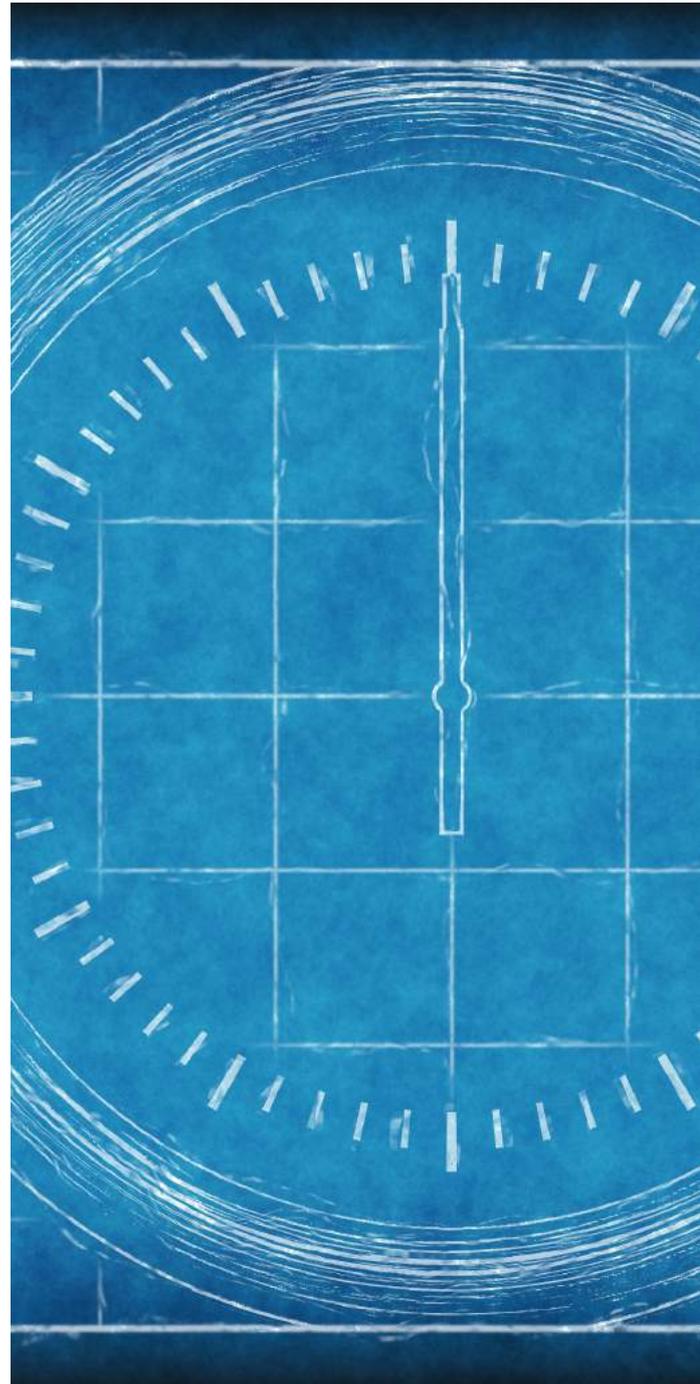

With years of delivery experience in a multitude of different sectors, our consultants have the skills and knowledge to adapt to the challenges of the most complex delivery environments.

TYPICAL CHALLENGES

In the modern economy change is a constant.

Many organisations are comfortable running singular projects that have minimal interdependencies and are relatively low risk.

The challenge of delivering a large-scale programme and securing the outcomes that the business require is often underestimated; it takes a different skillset to manage a multi-faceted set of initiatives and drive a set of project or workstream outputs to create the outcomes that are crucial to your business.

UNIQUE SOLUTIONS

B2E Consulting places strong emphasis on providing very experienced change professionals who are able to manage the most complex deliveries in your portfolio.

Our consultants have all been personally responsible for delivering high profile and difficult to deliver outcomes.
